Comments

(Population) Dec 31<sup>st</sup> Population estimates by sex and single year of age (to 85+ for 1974, to 90+ for 1975-91, to 100+ for 1992) for Taiwan Area. The data from source #1 represent Taiwan-Fukien Area. We use the data from source #2 to obtain population counts (in 5-year age groups) for Fukien province; because those data are available only by 5-year age groups above age 5, we estimate the distribution by single year of age by assuming that the age distribution within each 5-year age group is the same as it is for the Taiwan-Fukien Area as a whole. Then, we obtain population estimates for Taiwan Area by subtracting the estimated counts for Fukien province from the population estimates for Taiwan-Fukien Area.
